

# Friday 12<sup>th</sup> February 2021

## Learning Objective: to report my findings (Tooth Decay Enquiry)

- Make sure you have completed your observations. Do not worry if you haven't done as many as 7 days, 3 or more should give you good enough results to compare!

Day 1	Day 2	Day 3	Day 4	Day 5	Day 6	Day 7
 water	→	→	→	→	→	→
 coke	→	→	→	→	→	→
 orange juice	→	→	→	→	→	→
 apple juice	→	→	→	→	→	→
 milk	→	→	→	→	→	→

- In today's lesson, you will be reporting your findings. Consider the following questions when you write your conclusion:

- Was your prediction correct?
- What did you find out from your observations?
- What effect/s did the drinks have?
- What did you learn from the enquiry?
- If you were to do the experiment again, would you do anything differently?

Look at the observations you made on your **Tooth Decay Recording Activity Sheet** and complete the following:

Was your prediction correct? \_\_\_\_\_

Conclusion (Write here what you found from your observations, what effect the drink(s) had and what you have learnt from the enquiry/test.)
