

Bonjour,

I hope you all had a good rest over half-term and are ready for some more home learning! This half-term we will be covering habitats, learning how to say some common habitats in French, what animals and plants need to survive as well as what animals live in these habitats.

This week we will be looking at how to say what animals and plants need to survive such as water, sun, shelter etc.

Your activity this week is to complete two small worksheets, the first one is on **slide 21** where you will listen to the audio clip and match it with the picture. The second sheet can be found on **slide 23** where again you will listen to a small audio clip and again you will have to match the phrase with the corresponding picture.

The answers are on the following slide for each sheet so no peeking until you have completed it!

- Firstly, follow this link
<https://www.languageangels.com/homeschool/>
- Next enter the login details:
Username: **Stmary3040**
Password: **lahome**
- Then under intermediate challenge have a look for the unit 'Habitats'.
- Once found simply begin lesson 1.

This week I have included a vocabulary list with translations to make it easier for your adults to support you!

When playing through the slide show I would recommend repeating back the words and phrases to help with your pronunciation of them.

Au Revoir

Monsieur Hanson
